SSH!! QUIET SWEEPING IN PROGRESS

Gurney Reeve & Co designers and manufacturers of sweeping machines have been cleaning the streets of London with their new ELECTRIC urban sweeper.

The city of London cleansing department have been trial ling the ECO360 sweeper in a bid to reduce their carbon footprint. The quiet operation coupled with ZERO omissions enables it to work in populated pedestrian precincts and peaceful areas as shown in the picture!

The ECO360 electric sweeper operates an 8-hour working cycle between chargers allowing plenty of time for a full shift operation, it automatically stores 45 minutes of charge to ensure the machine can be got back to the depot. The versatile sweeper offers 1500mm sweeping path with two adjustable front brushes directing debris into the path of the main vacuum. Larger debris can be collected by opening a cab controlled front flap. A large stainless steel water tank ensures a controlled fine jet of water is sprayed prior to sweeping controlling dust. Debris is collected into a standard 360 litre waste bin this is electrically raised and lowered at the rear of the machine.

Simple to drive with electronic steering controls the sweeper offers a smooth ride with independent suspension on all four wheels and a maximum speed of 17kph.

The electric operation means low maintenance and almost ZERO running costs.
